Pictability™ Experience for ECI professionals

Experience Pictability™, a new tool which puts families in control of creating a vision for their child, family and self.

Although many parents have experienced planning for their child with a delay or disability, Pictability™ is a completely new approach. Developed by Plumtree, it is a fun, gamified way to help families explore new possibilities when setting a vision and planning to achieve positive outcomes. Pictability™ gives parents and carers clarity for the future and inspiration to get started.

In this practical workshop you will:

• Receive a Pictability kit for your personal use

• Use Pictability to create a vision for a child, family, self and set goals

• Prioritise three goals and identify practical steps to achieve them

Details

TIME	Monday, 24th June 2019, 1:15pm - 3:15pm
