

## Pictability Facilitator training

### A new way to plan and set goals

Support parents to set a vision for their child and family with an internationally acclaimed visioning tool that informs your family-centred approach. As a Pictability facilitator, you will inspire and guide families in their journey, and identify areas that require professional support. Pictability creates an achievable map for a good life.

#### Put families in the driver's seat

Pictability encourages playful exploration. Families reconnect with what's important to them, their family and their child.

#### Promote a holistic approach to family well-being

Research shows that parents often place all their energy into a child with a disability or delay. Pictability recognises the importance of parental well-being and considers the whole family. When a family thrives, the child thrives.

#### Focus on strengths and abilities

Pictability shines a light on a child's strengths. It encourages families to focus on the things their child can do, opening the possibilities for a bright future. Parents learn to get started on setting and prioritising achievable goals. Pictability also clarifies which goals need professional support to begin planning for early intervention services.
