

Now & Next School

Support your child to thrive at school and develop effective learning goals with educators

Now & Next School is an evidence-based program to discover your child's strengths, coach them to make choices and enhance collaboration with educators for an effective Individual Education Plan.

Learn about:

- Achieving better outcomes by working in partnership with educators
- Coaching your child to use their strengths to achieve goals
- Practical strategies for improving your child's wellbeing
- Taking a proactive role in developing your child's Individual Education Plan (IEP)
- Fostering your child's independent decision-making through our Child Voice model (Mahmic & Janson, 2019) and resources

Now & Next School is based on positive psychology and the science of wellbeing. Children with disability may find it challenging to have their opinions heard for planning and support. [Our Child's Voice model](#) enables you to guide them towards an authentic involvement in life decisions and become independent young adults.

The program is run by trained parent peer workers who are raising a child with disability or developmental delay.

Cost

\$640 per person or couple

(\$80.06/hour for 4 x 2-hour sessions)

The course cost can be claimed through NDIS funding* or purchased privately.

*NDIS Price Guide, listed as: Capacity-Building Supports, Improved Daily Living Skills, Training For Carers/Parents - Item no. 15_038_0117_1_3

Date and time

2x weekly sessions (Monday & Thursday); 2 hours each;
From Monday 1 September to Monday 22 September;
8pm to 10pm AEST/NSW time

[Adjust for your time zone](#) if necessary.

It is required that parents/carers be available to attend all four sessions.

Location

Online via Zoom

This program is for

Parents, carers or family members of primary school-aged children with disability or developmental delay. We encourage registration with a partner, co-parent or co-carer, as working together leads to the best benefits.

This program feels like exactly what I've been looking for. I've been searching for support to help me find new strategies for my daughter's next stage of development. It's such a shame it's only four weeks long!
